

## POSITION

As Minister of Science and Technology, you are pushing for the nation's "quantum tech for global good" agenda.

As you oversaw a major investment from the government into science R&D (which has been popular), you are supporting Bria National University's leadership in quantum computing.

## CONFLICT

### **Domestic conflict with government of Bria:**

Your interest in pushing Bria's "quantum tech for global good" agenda conflicts with the Bria Foreign Affairs Minister's objective of protecting its own innovation and economic interests.

### **Domestic conflict with CEO of Medormar Corp:**

You would like to see that Bria's quantum computing capabilities can be used for the public good to address major global challenges. This creates a possible conflict with Medormar Corp's interest in commercializing quantum tech for the international market.
