

POSITION

As Minister of Science and Technology, you are pushing for the nation's "quantum tech for global good" agenda.

As you oversaw a major investment from the government into science R&D (which has been popular), you are supporting Bria National University's leadership in quantum computing.

CONFLICT

Domestic conflict with government of Bria:

Your interest in pushing Bria's "quantum tech for global good" agenda conflicts with the Bria Foreign Affairs Minister's objective of protecting its own innovation and economic interests.

Domestic conflict with CEO of Medormar Corp:

You would like to see that Bria's quantum computing capabilities can be used for the public good to address major global challenges. This creates a possible conflict with Medormar Corp's interest in commercializing quantum tech for the international market.
